

2 types of *new* moisture testers for Coffee, Pepper, Grains, etc.

Multiple Moisture Tester PM-790 Pro

Accurately measure the *moisture content* and *density* of Coffee, Pepper, and so on.

- **99 calibration curves installed**
Coffee, Pepper, Seeds, Grains, Nuts, etc.
- **Sample density (g/l) is provided**
- **Displayable to 2 decimal places**
- **New calibration curve of Coffee**
Arabica and Robusta are separated. The compliance with ISO6673 has been improved.
- **New calibration curve of Pepper**
The compliance with ISO939 has been improved.

Measured in just 3 steps. No sample grinding or pre-weighting is required.

Multiple Moisture Tester PM-390

- **Quick and Easy operation**
- **25 calibration curves installed**
Coffee, Black pepper, Tea, Grains, etc.
- **New calibration curve of Coffee**
The compliance with ISO6673 has been improved.
- **New calibration curve of Pepper**
The compliance with ISO939 has been improved.

Type	PM-790 Pro	PM-390
Number of Calibration curves	99	25
Number of decimal places of measured value	2 digits	Single digit
Density (g/l)	Displayable with one click	N/A
Types of coffee	Green coffee 2004 Green coffee, Arabica 2018 Green coffee, Robusta 2018 Roasted coffee Dry cherry coffee Parchiment coffee, Arabica Parchiment coffee, Robusta	Green coffee 2004 Green coffee, Arabica 2018 Green coffee, Robusta 2018 Roasted coffee Dry cherry coffee
Types of spices	Black pepper 1995 Black pepper 2018 Red pepper 2018 White pepper 2018 Clove Mustard	Black pepper 1995 Black pepper 2018 Clove

The values represent the creation year of the calibration curve.
We reviewed the calibration curve in order to achieve better conformity to ISO6673 (coffee) and ISO939 (pepper). Also, we updated the bulk density measurement function in order to achieve better conformity to ISO959 (pepper).
